

Accounts Payable

For every **10,000 invoices** processed through Celerity's Accounts Payable automation solution your company will on average **save €50,000** through the reduction in administrative costs associated with manual invoice processing.

As finance departments are being tasked to do more with fewer resources there is an increasing focus on reducing the high costs of manual invoice processes. Celerity's Accounts Payable automation solution is a touchless, ready-to-go service that validates and presents all invoices to your financial suite package for payment.

Benefits

- 1. Reduce costs:** The streamlined accounts payable process delivers an immediate reduction in administrative costs.
- 2. Improve efficiencies:** An efficient world class accounts payable department that processes invoices with greater efficiency and accuracy than can be achieved with a manual, costly and error prone approach.
- 3. Improve profits:** By reducing transaction costs, taking advantage of supplier discounts and eliminate late-payment penalties.

Features

1. **Automated and outsourced:** There is no re-keying, scanning or aligning and the solution is geared for your growth so that there is minimal investment in IT and hardware.
2. **Validation of business rules:** Completely configurable so that supplier invoices are auto-matched against purchase orders and other compliance documents. Suppliers are then automatically notified where non-compliance arises and corrective invoice adjustments can be applied before invoice resubmission.
3. **Exception based workflow:** Designed to maximise resource time so that your staff are only notified or called upon when they need to be--on an exception basis.

Celerity RX Platform

The Celerity RX Platform is a powerful suite of scalable online services for business process automation. Quick to deploy, it manages many millions of invoice and order transactions per year on behalf of large, medium and small companies. Supported by comprehensive monitoring and management systems, it is hosted in a secure 24/7 environment for guaranteed business continuity.

Celerity

Specialising in business process and supply chain document automation since 1990, Celerity and its RX Platform has delivered real cost savings and measurable business benefits to over 550 companies of all sizes across a diverse range of industries. Key focus areas include automation solutions for accounts payable, accounts receivable and sales order processing.
